DEFINITIONS:

Area + Catalogue Number

A 4-letter area code plus a 4-digit catalogue number make up the course code, eg **BIOL 1033**. You can search for courses by using this code.

Class Number

Every class at UniSA has a unique number (eg **24813**). You use this number to enrol. Both the **enrolment class** and **related classes** have class numbers.

Enrolment Class

This can be a **lecture (LEC)**, **tutorial (TUT)**, **workshop (WSH)** or **practical (PRA)**, to name a few examples. It is the first class you must enter when you are enrolling.

Related Classes
(Non-Enrol Classes)

These are other required components of the course, and are in addition to the **enrolment class**. They can be one of the following class types - **lecture**, **tutorial**, **workshop** or **practical**, to name a few. In most cases you will have a choice (eg 1 tutorial to be chosen from 7).

However, in some courses, once you select the **enrolment class** you are automatically enrolled (**auto-enrol**) in a related class (eg a particular tutorial or practical at a particular time). The class number will be listed in the Auto-enrol column.

NOTES:

- The table above shows the full list of courses to be taken by a student undertaking a full-time load solely in this year of the program.
- Students are required to take two 4.5 unit elective courses, with approval of the Program Director. Any electives with prerequisites need to be negotiated with the specific school.
Not all electives will necessarily be available in any one calendar year and the decision on whether or not to offer a particular elective will depend on student demand in each School. Students may be allowed to substitute electives from other university programs with the approval of the Program Director. The list of electives can be found on the course home page (link attached).
