

Add accounting and multiply your business prospects.

Master of Business (Professional Accounting)

Why are so many CEOs and CFOs accountants? Simply because they have the unique mix of skills and business knowledge that's needed to make sense of today's complex business environment.

UniSA's Master of Business (Professional Accounting) is exactly what you need to broaden your career prospects to take you to the top. Our program adds value to your current qualifications and provides you with the tools to become a trusted business advisor, problem solver and knowledge manager.

If you are interested in combining studies in Accounting and Finance the new Master of Business (Professional Accounting & Finance) may be for you.

Plus, our program is flexible and works around your busy schedule so you can study either full time, part time or externally.

Our program also offers exit points along the way, allowing you to qualify for the Graduate Certificate or the Graduate Diploma in Business (Professional Accounting).

To find out more, attend our information event on Thursday 30 October at our City West campus.

To register, visit unisa.edu.au/commerce or call Debbie Jarc on **8302 0457**.
