

Water in Adelaide - Understanding the Crisis

“The worst drought since records have been kept”

“A once in 1,000 years drought”, “Water restrictions”, sound familiar?

Are rainwater tanks, desalination plants and recycled water the answer?

This seminar will explore some issues behind the “crisis” and address many of the questions it raises.

Presented by

Adjunct Professor John Argue

Urban Water Resources Centre

School of Natural and Built Environments

UniSA

Friday 20 April 2007

2.00pm–4.00pm

Lecture Room BH2-09

City Campus West – University of South Australia

70 North Terrace, Adelaide
