Integrated Supply Chain Management

+Graduate Certificate
+Graduate Diploma
+Masters Degree

Experience. The Difference.

Ensure industries and consumers receive the right product at the right time with a career in Integrated Supply Chain Management.

Plan your career from A to B with integrated supply chain management

With a lengthening supply chain and an increasing geographical separation due to globalisation, many industries are recognising the role and importance of integrated supply chain management. The profession represents a growing segment of the economy, playing a critical role in international trade.

Integrated supply chain management focuses on the management of materials, information and money from the point of origin to the point of consumption. Effective supply chain management gives organisations the competitive edge, through business excellence, global opportunities and improved customer service performance.

Strong international links also make supply chain and logistics management internationally relevant and provide global opportunities for professional supply chain managers.

Why study at UniSA?

Studying at UniSA offers the ideal combination of up-to-date theory and practical application for people wanting to pursue careers in integrated supply chain management. Ongoing industry partnerships ensure relevant material and practices are applied to teaching frameworks. Students are given the opportunity to join and network with appropriate industry associations, creating pathways for future career movement.

UniSA has designed courses to allow maximum flexibility for those working full-time and students can also choose to undertake courses online.

A combination of international research and industry experience mean that UniSA's Integrated Supply Chain Management program provides material which is relevant, practical and useful for executives and managers dealing with supply chains both domestically and internationally.

The program

The knowledge, skills and expertise developed in UniSA's Integrated Supply Chain Management program will encourage exceptional employment opportunities in various industries. As many organisations realise the growing importance and need for skilled professionals in this area, jobs in this profession are constantly in high demand.

Covering the manufacturing and service industries, UniSA's Integrated Supply Chain Management program is designed from a strategic management perspective. Students will explore networks and processes as well as global and international benchmarks.

The program will encourage students to directly engage with industry. Courses such as Supply Chain Management and Competitive Advantage; Integrated Logistics Management, Managing Sustainable Value Chains and Operations Management will be covered by the program.

Graduates of the program will be qualified to work in a number of management positions, including logistics, purchasing, operations, distribution, transportation and materials management. Supply chain managers may find employment in a variety of sectors including defence, corporate and private sectors or as business owners.

The Division of Business is accredited by the European Quality Improvement System (EQUIS).
