

Shari Luo

Topic: Backpacker tourism

Method: Mixed method, interviews and survey. Analysis with NVIVO and SPSS.

Email: luoxy010@mymail.unisa.edu.au

Alan Reddrop

Topic: Family business engagement - use by family businesses of external advice on family business issues

Method: Mixed method - email survey using survey instrument and SPSS, preliminary to semi-structured interviews, coded using grounded theory approach but with input of some prior theory and experiential knowledge; data analysis through own system using word processor functions.

Email: redad001@mymail.unisa.edu.au

Eliza Hixson

Topic: Social impact of events for young residents

Method: Mixed methods – interview, focus group and questionnaire. Qualitative data thematically analysed with NVIVO, quantitative data analysed with SPSS (descriptive, frequency, ANOVA and regression).

Email: eliza.hixson@unisa.edu.au

Jo McInnes

Topic: Human resource management and supporting health teams

Method: Familiar with qualitative research designs

Email: jo.mcinnnes@unisa.edu.au

John Hatzinikolakis

Topic: Emotional labour in organisations, currently focused on academic but previous research has been in hospitality

Method: Qualitative – interviews. Currently uses grounded theory to analyse data, but has also used content analysis

Email: john.hatzinikolakis@unisa.edu.au

Richard McGrath

Topic: Exploring Australian Local Government provision of Community Recreation Opportunities for People with Impairments

Method: Mainly Grounded Theory within a social constructionist framework as well as incorporating Critical Discourse Analysis.

Email: Richard.mcgrath@unisa.edu.au

Najmeh Hassanli

Topic: Commercial homes in Iran

Method: Qualitative, grounded theory

Email: hasny009@mymail.unisa.edu.au

Azmiri Mian

Topic: They don't understand us: Perspectives of Aboriginal operators in the Australian tourism industry

Method: Case study; mixed methods - content analysis, interviews (qualitative), survey (quantitative)

Email: azmiri.mian@unisa.edu.au
