**DEFINITIONS:**

Area + Catalogue Number

A 4-letter area code plus a 4-digit catalogue number make up the course code, eg **BIOL 1033**. You can search for courses by using this code.

Class Number

Every class at UniSA has a unique number (eg **24813**). You use this number to enrol. Both the **enrolment class** and **related classes** have class numbers.

### Enrolment Class

This can be a **lecture (LEC)**, **tutorial (TUT)**, **workshop (WSH)** or **practical (PRA)**, to name a few examples. It is the first class you must enter when you are enrolling.

### Related Classes (Non-Enrol Classes)

These are other required components of the course, and are in addition to the **enrolment class**. They can be one of the following class types - **lecture**, **tutorial**, **workshop** or **practical**, to name a few. In most cases you will have a choice (eg 1 tutorial to be chosen from 7).

However, in some courses, once you select the **enrolment class** you are automatically enrolled (**auto-enrol**) in a related class (eg a particular tutorial or practical at a particular time). The class number will be listed in the Auto-enrol column.

### Notes

1. The intake for this program is in Study Period 2 only.
2. Students without sufficient prerequisite knowledge in Calculus are given the opportunity to undertake Calculus M (MATH 5042) as an elective option. This elective option can also allow those who do have knowledge of Calculus to take a course such as Financial Theory and Financial Markets (BANK 5014) as their elective.
3. Special area of Finance or Insurance to be named and details of the content provided for each offering of the course, in line with current topical research in the discipline.
