#### DEFINITIONS:

- Area + Catalogue Number - A 4-letter area code plus a 4-digit catalogue number make up the course code, e.g. **BIOL 1033**. You can search for courses by using this code.
- Class Number - Every class at UniSA has a unique number (e.g. **4813**). You use this number to enrol. Both the **enrolment class** and **related classes** have class numbers.
- Enrolment Class - This can be a **lecture (LEC)**, **tutorial (TUT)**, **workshop (WSH)** or **practical (PRA)**. It is the first thing you must enrol in.
- Related Class 1 & Class 2 - These are a required component of the course, and are in addition to the **enrolment class**. They can be one of the following class types - **lecture, tutorial, workshop** or **practical**. In most instances you will have a choice (e.g. 1 tutorial to be chosen from 7).  
However, in some courses, once you select the **enrolment class** you are automatically enrolled (**Auto-enrol**) in a related class (e.g. a particular tutorial or practical at a particular time). The class number will be listed in the Auto-enrol column.
- Instruction Mode - This is the way in which the particular class type (**lecture, tutorial, workshop** or **practical**) is taught. It could be **'in person'**, **'online'** or by **'distance education'**.
