Dr Marloes Dekker Nitert

Senior Postdoctoral Research Scholar
Royal Brisbane Clinical School
University of Queensland

Epigenetic mechanisms in type 2 diabetes: Regulation of HNF4alpha in islets of Langerhans by diet during gestation

Dr Marloes Dekker Nitert received her PhD from Lund University, Sweden. She focused on molecular metabolism in pancreatic beta cells and its role in insulin secretion. Dr Dekker Nitert continued with a post doctoral fellowship studying the role of epigenetics in the pathogenesis of type 2 diabetes with Professor Leif Groop at Lund University. She recently moved to The University of Queensland to study the role of epigenetics in complications of pregnancy in close collaboration with clinicians from the Royal Brisbane and Women's Hospital.

Chair: Prof Caroline McMillen
Early Origins of Adult Health
