Date: Wednesday 20th April 2011

Time: 4:00pm – 5:00pm

Place: PM-06 (northern stairwell
mezzanine between floors 2 & 3)
Playford Building
City East Campus
University of South Australia
Frome Road, Adelaide

RSVP: 19th April 2011
sansominstitute@unisa.edu.au

The Sansom Institute for Health Research is pleased to invite you to a Visiting Researcher Seminar.

Dr Viv Perry

Lecturer in Ruminant Production Systems,
University of Queensland, Goondiwindi

Quantifying the effect of nutrient-gene interaction in utero in key tissues instrumental to productivity and sustainability of the beef industry

Dr Perry has a strong and consistent track record both in competitive research funding and publications in the field of maternal nutrition on the development of offspring. In addition to her own expertise in large-scale experiments with cattle, involving the control of the attrition and the process of reproduction, Dr Perry has collaborated extensively with an internationally recognised group of physiologists developing high-quality work in the area of fetal programming in ruminant models.

Dr Perry has also recently established a commercial sperm laboratory as well as completing current research on the effects of pre and post weaning nutrition on bull sexual development in partnership with her postgraduate students and industry. Dr Perry currently holds an Associate Professor position at Nottingham and Senior Research Fellowship at the Sansom Institute for Health Research.
