The Sansom Institute for Health Research is pleased to invite you to a Visiting Researcher Seminar.

Professor Michal Abrahamowicz

Department of Epidemiology, Biostatistics and Occupational Health
McGill University, Montreal Canada

Does it Still matter?: Assessing Cumulative Effects of Past Treatments, Exposures and Risk Factors: New Methods and Applications

Dr Michal Abrahamowicz is a full James McGill Professor of Biostatistics in the Department of Epidemiology, Biostatistics and Occupational Health of McGill University. His research involves both the development of new statistical methodology and collaborative research on epidemiological and clinical projects involving cancer, arthritis, cardiovascular, environmental and social epidemiology, and pharmacoepidemiology.

In 20 years, Professor Abrahamowicz has authored more than 230 peer-reviewed articles published in statistical, epidemiological and clinical journals. The impact of his methodological contributions to modern biostatistics and epidemiology is evidenced by invitations spanning 35 countries to present at seminars, workshops, symposia and conferences that include the most prestigious international biostatistical and epidemiological meetings: eg, International Statistical Institute (ISI 2009), International Society of Clinical Biostatistics (ISCB 2010 & 2011), International Biometrics Conference (IBC 2010), International Society for Pharmaco-epidemiology (ISPE 2006, 2008), Society for Epidemiologic Research (SER 2008).

Professor Abrahamowicz has supervised to completion 25 MSc and PhD students, and co-supervised a further 33 MSc and PhD additional students. He has also supervised five and co-directed four postdoctoral fellows.
